

The European Union and the Middle East (Contemporary European Studies)

The European Union and the Middle East presents a concise but thorough historical analysis of the relationship between the European Union and its predecessors and the Middle East, from the early 1950s to the present day. The authors provide a survey of the evolution of the foreign policy mechanisms of the EU and an outline of the relevant aspects of modern Middle East history. They examine the relationship between the two regions from 1950 to the end of the Cold War, with special emphasis on the period following the 1973/4 oil crisis. They go on to look at the post-Cold War era discussing the conflict with Iraq and examining the EU's continuing involvement in the Middle East peace process.
