

Work Like Nature: Sustainability lessons from ecosystems for your job or business

Do you want to take action at work that will benefit you, your job and your community as much as it helps the environment? Lea Elliott's *Work Like Nature* presents lessons from nature to help you make sense of sustainability and start making a difference. These ecosystem ideas are illustrated through inspiring stories from Vancouver-area green innovators. See how these bright thinkers from a variety of disciplines work like nature to benefit the environment and, surprisingly, to win at their job or business.

You'll see how a city secures its energy needs, a community designs a dynamic waterfront, and an entrepreneur protects our oceans. You'll also discover how a diversity of flowers growing in a blueberry field fortifies our food supply, how turning manure into renewable natural gas can in fact protect our water, and how views of nature make us healthier. Exercises and examples in each chapter will help you apply these lessons to your own work. By simply looking outside, you can gain insights to help you protect the environment, grow the green economy, build resilient communities and do work you're proud of. If you enjoyed Hawkens Ecology of Commerce, Braungart and McDonough's Cradle to Cradle or Benyuss Biomimicry you'll love *Work Like Nature*.
